# CAMPUS

## *Faculty benefits from multimedia lab*

by Katrina Supakit  
Bulletin Writer

Attention faculty and staff: need assistance with designing a web page or putting together multimedia presentations? If so, the Faculty Multimedia Lab in Visser Hall can help.

Greg Gallup, graduate teaching assistant, heads the lab within the Center for Educational Technology in Visser Hall 109. The lab provides assistance mostly to faculty/staff with web page designing, scanning, or any other kind of multimedia application.

According to Gallup, he helps the faculty/staff with any kind of multimedia assistance they might need. For instance, Gallup has taught a web page class geared toward faculty/staff, and helping them with various multimedia applications including Photoshop, HTML and creating CD-ROMS.

The Faculty Multimedia Lab is currently the first and only of its kind on campus, being geared at faculty and staff. According to

—Tracy Barber/Bulletin

**Greg Gallup (far right) is head of the multimedia lab in Visser Hall. He helps faculty and staff with projects.**

Gallup, the lab began with one computer and has grown to four PC's, two Macs, one portable Mac and one portable PC. It also contains equipment such as digital cameras

which take pictures to be published on the World Wide Web. Scanners are available to scan any type of

**Lab, see page 6**

photo or 35 mm slide for any type of multimedia use.

According to Dwight Moore, associate professor in the division of biological sciences, it's "nice for fac-

ulty/staff to have access to scanners (of this type)." Moore has used the scanners for pictures of organisms and habitats for use on his science web pages.

He has also published photos of past science trips on the Web, including some from a biology trip to the Bahamas six weeks ago. Gallup showed him how to scan the photos

onto the computer and Moore took care of the rest.

Although the lab is not funded primarily for student use, students may use the lab on a case by case

basis. Hours of operation for the lab are Monday through Thursday from 10 a.m. - 4 p.m.
