ESU Year of Information & Technology Event

"Instructional Technology Review & Update"

Flint Hills Room, Memorial Union
12:00 - 2:30pm
October 27, 1994

Key Speakers
Steve Griffin, IAT Director of Technical Services
Stephen Dischinger, IBM Higher Education
David Luttrell, IAT Manager of Network Integration Services
Joe Schuch, IAT Facilities Development and Support Consultant

Have you ever tried to select hardware and software for a multimedia lab or a master classroom, or been faced with purchasing a multimedia-enabled network or an interactive distance learning system? If so, you probably were confronted by a dizzying number of choices, all explained in acronyms. Tune in to our broadcast for clear answers from our experts as they discuss and demonstrate instructional technology from the basics to recently announced products.

In this broadcast you will learn about:

* basic instructional hardware technology, such as multimedia computer classroom equipment and networks,
* multimedia-enabled software for developing instructional applications and presentations, and
* exciting new instructional technologies that enable or enhance group-based learning, distance learning and network distribution of multimedia.
